

## If you are a good driver :

- At 16, you can drive with your parents
- You can drive at night
- You can't drive with more than 0,8% alcohol in your blood
- You may talk with your passengers
- You may listen to music when you drive
- You don't have to be nervous
- You must wear your seatbelt
- You must have an L-plates on your car if you are a young driver
- You mustn't forget your seatbelt
- You mustn't forget to adjust your mirrors.

- We can guess that driving under the influence of alcohol or drugs is illegal and very dangerous. Obviously, drunk-driving may cause an offence, car crashes & injured passengers and mortal accidents. So in my opinion, if you want to drive, you mustn't drink!
